

Patient & Family Advisory Committee

The Mississippi River Health Alliance has embraced the need for a Patient and Family Centered approach to quality health care and has prioritized the development of support systems that will allow us to enhance the delivery of health care services around the needs of our patients and their families at the Almonte General Hospital and the Carleton Place and District Memorial Hospital.

To support a Patient and Family Centered Care approach, the hospital is recruiting for membership for the Patient and Family Advisory Committee (PFAC). The purpose of the committee is to form collaborative partnerships between patients, former patients, caregivers, families and the hospital leadership team to improve quality of care and the patient experience. The PFAC acts in an advisory capacity to ensure the patient and family voice is integrated in the planning, delivery and evaluation of services at the hospital and to make recommendations on matters that impact their experience here
